

Cross-flow filters Flavy FX 2/3 ICS juice lees, X-Treme 4/10 and pre-filter Flavy D3/DB

Compared to other cross-flow filters available on the market, Flavy juice lees filters have significantly better performance:

- 2 to 4 times faster filtration and stable flow rate
- 2 to 3 times fewer rejects
- 4 times less cleaning products
- 3 times less water consumed
- Only 1 hour of labour per day (autonomous filter)
- Unique versatility:
 - Bentonite, activated carbon, PVPP, gelatin, Vegecoll, pea protein, casein... Most adjuvants and oenological products are usable.
 - Filtration of sedimentation, flotation and stall sludge.
 - Up to 30% MES (Suspended solids) accepted (centrifugation method at 3000 rpm for 5 minutes).

Flavy	Average flow hl/h	Maximum volume of juice lees to be treated per day
FX2 ICS juice lees	5	115 hl
FX3 ICS juice lees	7,5	175 hl
X-Treme 4	10	230 hl
X-Treme 6	15	350 hl
X-Treme 8	20	460 hl
X-treme 10	25
